# POSITION AVAILABLE

## Research Nurse

### St. Mary's Research Centre

#### Job description

The research nurse will work as member of a multi-centric research project in the field of obstetrics. Under the supervision of the local investigator and the coordinating center team from CHU Sainte-Justine, the nurse will recruit participants and oversee the progression of the project at St. Mary's Hospital Center.

#### Experience and skills

- Member of the OIIQ
- Minimum 5 years of experience in clinical research
- Experience in multi-centric studies
- Can easily draw blood (with or without a butterfly needle)
- General knowledge of obstetrics and gynaecology
- Cares about the protection of research participants
- Bilingual French and English (written & spoken)
- Autonomous, organized, able to manage priorities
- Good people skills and resourceful
- Basic computer knowledge (Office)

#### Tasks and responsibilities

- Recruit participants
- Obtain informed consent
- Complete study interviews and tests
- Collect & process study specimens
- Complete administrative documents after each visit
- Ensure a good collaboration between the delivery room staff and the research staff
- Oversee the site's research budget
- Supervise research assistants and on-call staff
- Oversee quality of the data and sample collected
- Identify and solve problems on site, in collaboration with the local investigator and the coordinating centre
- Implement new study procedures on site when requested by the coordinating centre
- Act as the main contact for all communications with the coordinating centre
- Attend bi-weekly phone conference with other study sites
- Any other task necessary and related to the research project

#### Working conditions

Status: Full time (35 hours per week)

Duration: 1 year contract, renewable

Salary: based on qualifications, and according to the policies of St. Mary's Research Centre

Please send a cover letter, CV, and a list of three (3) references to

**L'excellence au coeur de nos soins**  
*Caring through excellence*

Built on the slopes of Mount Royal, St Mary's Hospital was inaugurated in 1924. The 316-bed institution has built a reputation of excellence in the realm of specialized acute care and various medical specialties since its inception. The development of high quality research is also one of the Hospital's top priorities, especially in light of its recent designation as a *Centre hospitalier affilié universitaire*.
